

## Meta Remodeling Awards 2017

*A Remodeling Awards Program Sponsored by NARI of Silicon Valley*

### Historic Renovation/Restoration Recognition

This special recognition is defined as the renovation/restoration of the interior and/or exterior of a residential structure, or addition to a residential structure, built prior to 1935. Any and all changes are to have closely matched architectural style and building type. Any and all products used are to be of a material authentic in style to the area in which the building was originally built, paying special attention to period trim detail and period coloring. Restoration of missing historic features and added structures are to respect the essential historic character and architectural style of original building design.

#### Historic Renovation/Restoration Criteria

Historic Rehabilitation is defined by the Secretary of the Interior as:

*The act or process of returning a property to a state of utility through repair or alteration which makes possible an efficient contemporary use while preserving those portions or features of the property which are significant to its architectural and cultural values.*

#### The Secretary of the Interior's Standards for Rehabilitation

The intent of the standards is to assist the long-term preservation of a property's significance through the preservation of historic materials and features. The standards pertain to historic buildings of all materials, construction types, sizes, and occupancy and encompass the exterior and interior of the buildings. They also encompass related landscape features and the building's site and environment, as well as the attached, adjacent or related new construction. To be certified for Federal tax purposes, a rehabilitation project must be determined by the Secretary to be consistent with the historic character of the structure(s), and where applicable, the district in which it is located.

As stated in the definition, the treatment rehabilitation assumes that at least some of the repair or alteration of the historic building will be needed in order to provide for an efficient contemporary use; however, these repairs and alterations must not damage or destroy materials, features or finishes that are important in defining the building's historical character.

***The standards are to be applied to specific rehabilitation projects in a reasonable manner, taking into consideration economic and technical feasibility.***

1. A property shall be used for its historic purpose or be placed in a new use that requires minimal change to the defining characteristics of the building and its site and environment.
2. The historic character of a property shall be retained and preserved. The removal of historic materials or alteration of features and spaces that characterize a property shall be avoided.
3. Each property shall be recognized as a physical record of its time, place and use. Changes that create a false sense of historical development, such as adding conjectural features or architectural elements from other buildings, shall not be undertaken.

## Meta Remodeling Awards 2017

*A Remodeling Awards Program Sponsored by NARI of Silicon Valley*

4. Most properties change over time; those changes that have acquired historic significance in their own right shall be retained and preserved.
5. Distinctive features, finishes and construction techniques or examples of craftsmanship that characterize a property shall be preserved.
6. Deteriorated historic features shall be repaired rather than replaced. Where the severity of deterioration requires replacement of a distinctive feature, the new features shall match the old in design, color, texture, and other visual qualities and, where possible, materials. Replacement of missing features shall be substantiated by documentary, physical or pictorial evidence.
7. Chemical or physical treatments, such as sandblasting, that cause damage to historic materials shall not be used during the remodel. The surface cleaning of the structures, if appropriate, shall be undertaken using the gentlest means possible.
8. Significant archeological resources affected by a project shall be protected and preserved. If such resources must be disturbed, mitigation measures shall be undertaken.
9. New additions, exterior alterations, or related new construction shall not destroy historic materials that characterize the property. The new work shall be differentiated from the old and shall be compatible with the massing, size, scale, and architectural features to protect the historic integrity of the property and its environment.
10. New additions and adjacent or related new construction shall be undertaken in such a manner that if removed in the future, the essential form and integrity of the historic property and its environment would be unimpaired.
